Future Markets Make Security Look Good, Tips & Tactics, October, p. 92.

Home Market Open for Business, Special Report, Part II, July, pp. 44-48.

A Microwave Link With A New Direction

Microwave is the ideal solution when camera and monitor are in separate buildings and co-ax linkage is impractical. But we've added something extra to microwave: two-way communications.

With M/A-COM's new 23VX, you can have a two-way link not only for intercom, but for video and camera controls as well. Or, choose any combination of one-way and two-way paths, depending on your need. We offer a variety of subcarriers so you can combine intercom and controls with video in a single microwave system.

With over thousands of installations worldwide, M/A-COM understands microwave communications systems. For more information, contact M/A-COM MAC, Inc., 5 Omni Way, Chelmsford, MA 01824 (617) 272-3100.

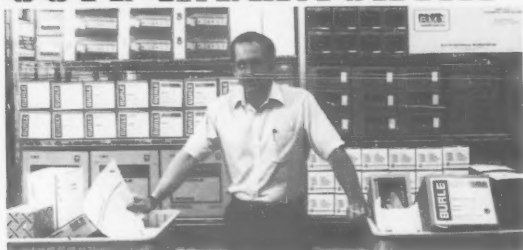

See us at the ISC Expo in Orlando

M/A-COM

CCTV INVENTORY...

WHAT YOU NEED . . . WHEN YOU NEED IT

Richardson Electronics is geared to provide you with the best service and the best values to maximize your profits on any CCTV installation. Check all the advantages:

- ☐ A Multi-Million Dollar Inventory
- ☐ Same Day Shipment
- ☐ Name Brand Selection
- ☐ Outstanding Values
- ☐ Technical Know-How
- ☐ Full Service Center

Call or write for FREE catalog or our latest "Stock Report".

FIBER OPTIC VIDEO LINK

Ventronic manufactures the most compact, light-weight, easy-to-install video transmitters and receivers in the industry.

We've designed the Ventronic Video Transmitter to be mounted unobtrusively on the back of the video camera itself, with no coaxial cable needed. And in most cases, you can power the device directly from the camera.

Ventronic Video Receivers are designed to be installed individually, or clustered in 19-inch racks as a patch panel between the fiber and coaxial cables.
